ZEYAD GAMAL

DevOps & Cloud Infrastructure Engineer · AWS | Kubernetes | Terraform

Cairo, Egypt | +20 1097011799 | **zeyadabosetta2@gmail.com** | **linkedin.com/in/zeyadabosetta** | **github.com/Zeyad-Gamal** | **zeyad-gamal.github.io/portfolio**

PROFESSIONAL SUMMARY

DevOps and Cloud Infrastructure Engineer with hands-on experience designing and operating cloud-native platforms on AWS using Terraform, Ansible, Kubernetes (EKS), Docker, and Jenkins CI/CD pipelines. Proven ability to provision, automate, and scale infrastructure for production systems — including a real-world SCADA and SOC industrial platform deployed on AWS EKS. AWS Certified Cloud Practitioner with a strong backend development background in Node.js and PHP Laravel, enabling deep understanding of application requirements from code to cloud.

DEVOPS & CLOUD EXPERIENCE

DevOps Engineer

Digilians Scholarship · Feb 2026 – Jun 2026

- Orchestrated containerized applications using Docker and Amazon EKS, reducing environment setup time by 60% and streamlining developer workflows.
- Engineered automated CI/CD pipelines with GitHub Actions and Jenkins, integrating Trivy vulnerability scanning and SonarQube code quality gates.
- Provisioned AWS cloud infrastructure (EC2, VPC, IAM, EKS) using Terraform IaC across multiple environments.
- Applied Ansible playbooks for configuration management across 5+ server environments, reducing manual config time by 50%.
- Administered Linux (Ubuntu/CentOS) systems and performed Bash shell scripting across 5+ environments, ensuring 99% uptime.
- Monitored infrastructure using ElasticSearch and Kibana dashboards, improving incident response time by 40%.

PROFESSIONAL EXPERIENCE

Freelance Backend Developer

Self-Employed · Sep 2022 – Present

- Constructed and deployed 10+ backend applications using Node.js, Express.js, and PHP Laravel across multiple industries.
- Supervised deployment workflows using Git/GitHub and Docker across all client projects, maintaining zero critical incidents.
- Integrated payment gateways and third-party services, enabling live transaction processing for 3+ client products.
- Optimized MySQL and MongoDB queries, improving application response times by up to 30%.

Core Team Member – Web Development

GDSC – AAST Aswan · Oct 2023 – Mar 2024

- Collaborated in Agile sprints within a 6-member team, consistently meeting bi-weekly delivery targets.
- Shaped backend architecture decisions that reduced API response time by 20% in core modules.
- Raised sprint task completion rate by 35% through structured coordination and clear task ownership.

PROJECTS

SOC-Integrated Industrial Monitoring & Decision Support System | Repo

Graduation Project · Team Leader · Cloud & Infrastructure Lead

Led the cloud infrastructure design and deployment of a production-grade industrial monitoring platform integrating SCADA, SOC, and AI-assisted incident analysis. Provisioned the entire AWS infrastructure using Terraform, including VPC, subnets, IAM roles, and EKS cluster configuration. Managed Kubernetes (EKS) deployments for all microservices and automated server configuration using Ansible playbooks. Enforced Jenkins CI/CD pipelines for continuous delivery to AWS EKS. Built backend services and an AI Agent using Laravel, PHP, Python, MySQL, and WebSockets with real-time anomaly detection and centralized logging.

Waste Bank Management Platform | Repo
Developed a production-ready agricultural waste management backend using Node.js, Express.js, MySQL, Sequelize, and RESTful APIs, supporting farmers, offers, purchases, inventory, factories, sales, and shipments. Containerized with Docker and deployed on AWS EC2 behind Nginx. Implemented GitHub Actions CI/CD with automated testing, Docker Hub image builds, Trivy vulnerability scanning, database migrations, and automated production deployment.

Dokkanco — WhatsApp-First Reseller Storefront Platform | Repo
Built and deployed a production-ready storefront platform for small businesses and resellers to showcase products, manage catalogs, and receive orders through WhatsApp. Developed the REST API using Laravel 13/PHP 8.3 and the frontend with Vue 3. Implemented Dockerized deployment on Railway with GitHub Actions CI/CD, commit-based Docker image versioning, MySQL, and Cloudflare R2 for product image storage. Configured automated database backups and health checks.

Egyptian Consulate in Kuwait – Internal Visa & Telegram Booking System | Repo
Client Project · Egyptian Consulate, Kuwait
Developed a secure internal web system for the Egyptian Consulate in Kuwait to manage online visa appointments and official telegram bookings. Built with PHP Native following MVC architecture. Delivered role-based access for consulate staff, appointment scheduling workflows, and secure data management for sensitive government records.

Medca – Medical Equipment Management Platform | Repo
Client Project · Medca
Constructed a scalable backend platform using Node.js, Express.js, Sequelize ORM, and MySQL. Provided RESTful APIs, relational database associations, transactional CRUD operations, and image upload management following clean code practices.

TECHNICAL SKILLS

DevOps, Cloud & Security: AWS, Terraform, Ansible, Kubernetes (EKS), Docker, Docker Compose, Jenkins, GitHub Actions, CI/CD Pipelines, Linux, Nginx, Bash, Prometheus, Grafana, ElasticSearch, Kibana, Trivy, SonarQube
Networking: SSH, DNS, IP Addressing, Firewalls
Backend & Programming: Node.js, Express.js, PHP, Laravel, Python, JavaScript, RESTful APIs, MVC, Design Patterns
Databases: MySQL, MongoDB, SQL, SQLite
Frontend: Vue.js, TypeScript, HTML, CSS, Bootstrap

EDUCATION

BSc Computer Science · Arab Academy for Science, Technology and Maritime Transport
2020 – 2024 · Graduation Project: Lung Cancer Detection System — Grade A+

CERTIFICATIONS

- AWS Certified Cloud Practitioner (2026)
- GDSC Core Team Recognition – Google Developer Student Clubs (Jul 2024)
- CIB Bank Training Program (Aug 2023)
- ITI Training – Software Testing (Feb 2023)
- ACPC Participant – Africa & Arab Collegiate Programming Championship (Aug 2021)
